

Used on more than
150 million ft² (13.9 million m²),
RetroPlate® is your green flooring solution!

2006 TOP 10 GREEN BUILDING PRODUCT

Environmental Building News and *Green Spec*® named RetroPlate® Concrete Polishing System as one of its **Top 10 Green Building Products** in 2006.

One of the many advantages of using RetroPlate® is due to its environmentally safe properties. The RetroPlate® System uses no solvents or volatile organic compounds. It is an odorless, non-flammable and non-toxic system.

In every step of the RetroPlate® System, an environmentally safe approach is taken. RetroPlate® has contributed to numerous buildings earning their LEED Platinum, Gold and Silver status. Once a project has committed to being "GREEN," RetroPlate® is the obvious choice.

As mentioned in *Environmental Building News*, February 2006:

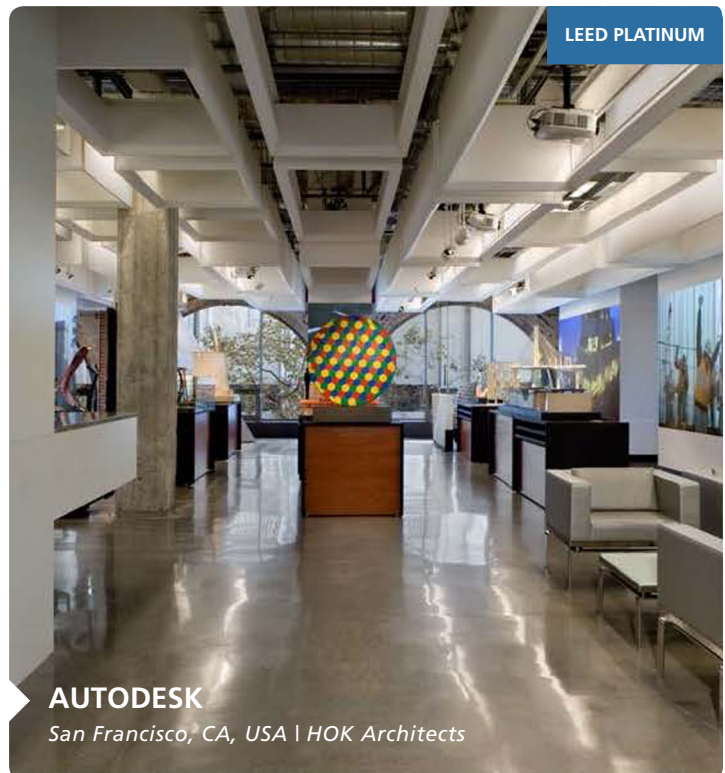

- LEED Credit Relevance - Materials & Resources Credit 1: Building Reuse
- Reduces impact from construction and demolition
- Alternative to hazardous component
- No VOCs
- Releases minimal pollutants
- Exceptional durability
- Low maintenance
- Reduces heating and cooling loads
- High reflectivity can reduce light level
